Amendment to the Claims

This listing of claims will replace the prior version in the application.

- 1. (currently amended) A sulfur-donor vulcanizing agent comprising the combination of:
- 10 to 90% by weight_of a product (I) consisting of a mixture of poly(alkylphenol) polysulfides of formula:

$$\bigcap_{R}^{OH} \left[S_{n} \right] \bigcap_{P}^{OH} \left[S_{n} \right]$$

in which:

- R is a tertio-butyl radical or tertio-pentyl radical an alkyl radical having 4 to 10 carbon atoms, the
 average value of n and n' is approximately 2, and the average value of p is approximately 5 n and n'
 are each greater than or equal to 1 and less than or equal to 4, and p is an integer between 0 and 20;
- n and n' are two integers that are identical or different, each being greater than or equal to 1 and less

 than or equal to 8,
- p is an integer between 0 and 50, and
- from 10 to 90% by weight of a <u>urea</u> compound of formula (II)

R'NHCONHR" (II)

in which R' and R'' that are identical or different, each represent an alkyl radical having 1 to 3 carbon atoms.

2-7. (canceled)

- 8. (previously presented) A method for vulcanizing a vulcanizable elastomeric composition of the EPDM type presenting no risk relative to formation of nitrosamines, comprising the incorporation of an effective quantity of the vulcanizing agent as claimed in claim I in the vulcanizable elastomeric composition.
- (previously presented) The vulcanization method as claimed in claim 8, characterized in that the elastomeric composition incorporates as an elastomer one or more terpolymers of ethylene, propylene and ethylidene norbornene.
- 10. (previously presented) The vulcanization method as claimed in claim 8, characterized in that the effective quantity of vulcanizing agent is between 0.4 and 6 parts by weight, per 100 parts by weight of elastomer.
- 11. (previously presented) The vulcanization method as claimed in claim 8, characterized in that the effective quantity of vulcanizing agent is between 0.8 and 3 parts by weight per 100 parts by weight of elastomer.
